SPC FLOORING

Stone Crystal Flooring

Stone Crystal Flooring,

Stone crystal flooring uses natural limestone ore powder and

polymer resin powder as the main raw materials,

combined with a UV protective layer, wear-resistant protective layer,

and a high-definition textured decorative layer,

and is manufactured by a high-temperature, high-pressure integrated extrusion process,

representing a new generation of environmentally friendly materials.

The stone-crystal flooring has a natural texture and aesthetic appeal,

and also possesses multiple superior properties, making it suitable for indoor applications in homes,

commercial, and public spaces.

The surface design is rich, able to present a variety of colors and textures,

meeting the needs of different design styles.

NEWPEARL WALL PANELS

Pearl Wall Panels

New Pearl wall panels include Stone Crystal panels and Snow Crystal panels, combining rigidity and flexibility, allowing bendable designs. Wall corners or turns require no jointing, and the grain continues naturally.

The products come in a diverse range of patterns with rich textures,

Including beautiful stone, skin-feel, fabric texture, micro-cement, wood grain, artistic textures, etc.,

innately providing a warm, soft, and comfortable tactile quality,

Displays a clean, pure, and vibrant harmonious beauty,

and can effortlessly accommodate styles such as light luxury,

Italian, new Chinese, Japanese, and minimalist.

MCM FLEXIBLE STONE

Eco Soft Porcelain

Eco Soft Porcelain,

Made from inorganic raw materials found in nature—such as
soil, stone powder, tailings powder, discarded cement chunks,
and ceramic waste—this material is formed through
composite modification, a specially designed
temperature-controlled shaping system, baking, and irradiation crosslinking.

A modified inorganic powder composite architectural decorative sheet.

Eco soft ceramic offers multiple advantages for exterior walls and curved surfaces,

widely suitable as exterior wall cladding for residences, apartments, and villas,

exterior thermal insulation cladding, municipal projects such as education, healthcare, culture, sports, and eldercare,

as well as commercial spaces, hotels and guesthouses, urban renewal, and renovation of old spaces.

SOFT STONE

Mingzhu Soft Stone

Mingzhu Soft Stone,

The main raw materials are high-quality quartz sand, stone powder, and

high-performance polymer, with color derived from the quartz sand itself and zero added color paste.

It is a flexible, thin, crack-resistant, waterproof, and

weather-resistant environmentally friendly wall decorative panel that provides good protection for buildings.

Mingzhu Soft Stone offers a rich variety of expressions,

textures such as granite, tufa (travertine), sandstone, slate, wood grain, and rammed earth

can all be realistically represented, and through diverse forms of expression can meet different design requirements,

infusing spaces with the blended beauty of nature and art.

Wall
