上海利滨线缆有限公司
Shanghai Libin Cable Co.,Ltd.

公司简介

Company Profile

上海利滨线缆有限公司成立于 2006 年，厂区建筑面积达5000平方米，现有员工 60 人。公司配备先进的生产及检测设备，凭借严谨的品控体系，产品已通过中国 CCC、欧盟 CE、北美 UL 及 CUL 、德国TÜV等多项国际认证，并获 ISO9001 质量管理体系认证。

公司产品线丰富，涵盖动力电缆、柔性数据传输电缆、机器人柔性电缆、中低压扁平电缆、中低压卷筒电缆、拖链电缆、低烟无卤电缆、新能源汽车电缆及特殊定制电缆，可满足多领域个性化用电连接需求。

高效的反应机制和差异化的产品设计保证了利滨公司在市场上的竞争优势，从而也为广大客户提供最优质、最经济的电缆解决方案，我们始终在努力成为您的最佳合作伙伴，并致力于发展成为国内柔性电缆专业制造商。

Shanghai Libin Cable Co., Ltd. was established in 2006, with a factory area of 5,000 m^2 and 60 employees. Libin is equipped with advanced production and testing equipment. Its products have passed multiple international certifications such as China CCC, EU CE, North America UL and CUL, and TÜV, and have also obtained ISO9001 quality management system certification.

Libin's products are diverse, including power cable, flexible data transmission cable, robot flexible cable, medium and low voltage flat cable, medium and low voltage drum cable, drag chain cable, low smoke zero halogen cable, new energy vehicle cable and special customized cablen , which can meet the personalized power connection needs of various fields.

Differentiated product design and efficient response mechanism ensure Libin's competitive advantage in the market, thereby providing the best and most economical cable solutions for customers.

We are striving to be your best partner and are committed to developing into a specialty manufac-turer of flexible cables in China.

• Flexible drag chain cable

This type of cable is not only flexible and easy to bend, but also has the characteristics of heat resistance and oil stain resistance. The products are widely used in industrial automation equipment, conveying equipment, machine tools, etc. They can withstand moderate mechanical stress and move freely.

• Robot cable

Anti-torsion robot cables are specially designed for applications that require high bending and continuous twisting movements. They are generally installed in the pipeline packages of articulated arm robots and are used in industries such as industrial manipulators, automated equipment, and automotive manufacturing.

• Servo cable

This cable is mainly used for the connection between servo motors and frequency converters. It is suitable for automated equipment, industrial robots, and mobile servo systems with bending components such as drag chains. It is used to provide power and control drive connections for servo systems under frequent reciprocating movement and bending

C·Flat cable

Flexible flat connection cables are widely applicable to heavy mobile mechanical equipment such as cranes, overhead cranes, gantry cranes and overhead cranes. It can be used as a power supply cable or control connection cable for equipment and is suitable for suspended mobile installation or mobile installation in the reel/reel area.

• Drum cable

It is widely applied in various mechanical equipment such as electric loaders, rock drilling jumbos, and tunnel boring jumbos, and is widely used along with the equipment in underground mining operation sites, tunnel construction sites, or other underground engineering construction sites.

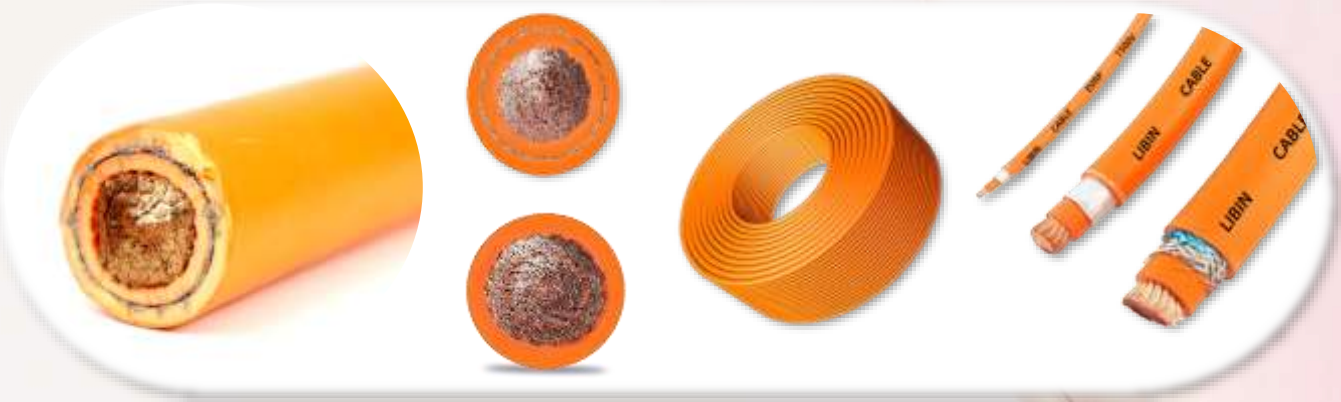
• Vehicle cable



High-voltage wires for electric vehicles are used to connect the charging port with the battery, the interior of the battery, the battery with the engine and other components, as well as battery energy storage devices and other fields, serving as a carrier for power transmission. Due to the harsh application environment inside the vehicle, high-voltage cables for electric vehicles have very high performance requirements.
