SPECIFICATION

Model	PL263
Dimensions	263x43.6x41mm
Voltage	DC5V
Power	5W
Electric current	1A
Weight	0.2kg
Screw installation	250mm
Light quantity	500LM
Color temperature	6000K
The use of bearing	-20°C~+40°C
Installation mode	Magnet tightening/screw installation
Working life	50000h
Switch type	Button Switch
Switch mode	Seven modes: Main light (10%/50%/100%) and flashlight (50%/100%/SOS/Strobe)
Certificate	CE. EMC. ROHS

SPECIFICATION

Model	PL233	PL400
Dimensions	272*38*21mm	448*38*21mm

Charging time	3.5h	4h
Weight	0.22kg	0.28kg
Screw installation	250mm	425mm
Light quantity	>650LM	
Color temperature	5000~6500K	
The use of bearing	-10°C~+45°C	
Induction distance	2m(The human body automatically shuts off after 20 seconds of leaving)	
Installation mode	Magnet tightening/screw installation	
Working life	50000h	
Control mode	Constant light mode/human body sensing mode	
Certificate	CE. EMC. ROHS

Application

LK12-W Series LED light is designed for instrument cabinet illumination of various switchgear, built in infrared sensor switch, and simplify the user's application design.

Features and advantage

- Built in infrared sensor switch, the user do not install additional switch.
- Economize on energy, In the case of illuminate effect same alike the traditional light, economizing on energy is 75% above.
- Life span is long, the LED light source, someone call it the longevity light, meaning to extinguish never. It's the solid cold light source, adopt a special electric circuit design, the life span can reach to for 100,000 hours, comparing traditional light source life span to grow 1000% above.
- The environmental protection performance is better, without ultraviolet ray and infrared rays in the spectrum, without calories and radiate, the dizzy light is small, and the castoff can recover, without pollution and do not contain the mercury chemical Element. The cold light source, can be touched, belong to typical model of the green illuminate light source.
- Special circuit design, if anyone LED is bad, it isn't without influence to normal illumination of others LED.
- Special structure design, light body position can be adjusted, that solves the problem of less illumination angle of LED.

SPECIFICATION

Model	LK-12W(sensor)	LK-13W
Power supply	AC(50/60hz)/DC (80~265v), or other voltage customer demand.	
Average illuminance at 300mm from lamp	>3001x	
Color rendering index Ra	> 85	
Switch	Built in infrared switch, active distance 20~80mm	Build in switch
Terminal	Screw terminal, 0.5~2.5mm ²	
Working environment temperature	-25°C~55°C	
Fix method	Two hole fixation	
Color of the light	White	
IP code	IP20	
Withstand voltage	AC2500V, 1 min	
luminescence component	LED	
Rated humidity	25~95%	
Mean life	More than 100,000h	
Power	6W	

DIMENSION (mm)

LKL10-W series cabinet instrument room lighting is designed for all kinds of switchgear instrument room lighting applications.

Features and advantage

- Economize on energy, In the case of illuminate effect same alike the traditional light, economizing on energy is 75% above.
- Life span is long, the LED light source, someone call it the longevity light, meaning to extinguish never. It's the solid cold light source, adopt a special electric circuit design, the life span can reach to for 100,000 hours, comparing traditional light source life span to grow 1000% above.

The cold light source, can be touched, belong to typical model of the green illuminate light source.
- Special circuit design, if anyone LED is bad, it isn't without influence to normal lumination of others LED.
- Special structure design, light body position can be adjusted, that solves the problem of less lumination angle of LED.
- The power supply adapt to AC/DC110~230V, suitable in application case of switchgear especially .

Install

It can be assembled by pins or screws. When assembling, fix the mounting bracket first. After connecting the power cord to the lamp body terminal, insert one end of the wiring terminal of the lamp body into the assembly hole on one side of the mounting bracket. At the other end, use a tool (using a straight screw batch) to open the other side of the mounting bracket and insert it.

The Angle between the mounting bracket and the lamp body can be adjusted according to lighting requirements.
