

VF711

Quick Start Guid

1. Appearance Introduction

2. Equipment Installation

Please insert the cable into the terminal before installation.

- 1) remove the anti-disassembly screw with the four-corner screw and remove the hanging plate.
- 2) attach the hanging board to the wall and drill holes, and fix the hanging board to the wall with screws.
- 3) hang the equipment on the installed hanging board and insert the anti-disassembly screw.

3. Schematic Diagram of Access Control System

4. Connect Door Magnetic, Door Switch

5. Connecting Door Lock

This equipment can support normally open and normally closed locks. NO terminals should be used for locks that are opened when power is on and closed when power is off, and NC terminals should be used for locks that are closed when power is on or opened when power is off.

1) Normally Closed Lock with Power

2) Normally Open Lock with Power

6. View System Information

Press the “#” key, enter the administrative password “115200”, press “#” to confirm, enter the device management interface, and press “1 #” to view the system information.

7.Add Device (Background)

(1)

(2)

(3)

1. Click "Community –"door Management", as shown in figure (1).
2. Click "add" to fill in the relevant information about the door. "installation location" can select "Community, Unit, Room" to create the door. The door number is used to write the card, and click "submit", as shown in figure (2).
3. Click "equipment"–"add" to fill in the equipment–related information, and click "submit", as shown in figure (3).

Note: two door machines are not allowed to be installed at the same door (installation location). When adding a door machine, the corresponding user information, user face, card, management machine, indoor machine, house, property, advertisement, announcement, visitors and other data will be added to the device.

8. Online, Offline (Background)

Click "Equipment"—"Equipment Status Monitoring"to view the online and offline status of the equipment.

The screenshot shows the 'Smart Communi...' interface with the 'Device Status Monitoring' section active. The sidebar on the left contains various navigation options, and the main area displays a table of device status data. The 'Status' column is highlighted with a red box, indicating 'Offline' for several devices. The 'Device name' column also has a red box around the first entry.
