IMPACT BITS

Professional impact and torsion bits are designed by forging or mixed and reducing shank body to increase their torque and strength. Higher torque bits is able to absorb high peak loads of impact to provide leading industrial performances in all impact driver appliances.

COLD FORGED RIB BITS

Rib screw bits is reduced by cold forged ,grips better than universal bits.

STAINLESS-STEEL BITS

Corrsion-proof, weatherproof, ideal for use in harsh conditions, as well as repairing food-processing and medical machinery

DIAMOND BITS

Diamond-Tipped improved screw engagement reduces the risk of damage to the screw head.

COLOURED RING BITS

Colour Ring bits looks very beautiful and consumers differentiate between screw-driver bits easily.

DOUBLE END HIGH TORQUE BITS

Unique diameter of reduced shaft in middle section is developed to withstand higher torque and continuous impact action from impact drivers.

. The special torsion section performs higher torque angle to absorb high peak loads of impact drivers.

. The bits life is extremely longer than universal bit.
