Stars in the Universe, Embracing the Hundred Rivers

In the vast universe, only Earth is a habitable home. This blue planet covers over 70% of its surface with oceans, and the boundless sea carries our desire for happiness and our quest for knowledge to broaden our horizons. Therefore, we took the ocean in the interstellar as the starting point for design and developed a vehicle with the code name "Star Sea". In the design of this vehicle, we abstractly optimized the stars in the universe and whales in the sea to create a comfortable vehicle that better suits travel needs.
