ALUMINIUM ROLLER SHUTTER DOORS&WINDOWS SERIES

Aluminium roller shutters are designed and widely used for commercial, residential and industrial applications such as shopping mall, house, villa, garage, factory, bank and so on. There are various of aluminum rolling shutters profile designs which can be made as doors or windows with competitive advantages in appearance, environmental protection and safety.

It can paint all kinds of colors and patterns on its surface, and cover coating, stereoscopic wood grain and sand grain and so on, which highlights its nobility, obviously improves the grade of your building and make your building stand out among buildings. It can effectively block sunlight radiation. With humanized and intelligent design which integrates the sound insulation, anti-theft, anti-mosquito and other protective functions, it can be categorized as insulated roller shutter with polyurethane or without PU, security roller shutter with reinforced steel, windproof rolling shutters, perforated roller shutter, grill roller shutter and skylight roof shutter windows. Contact us for more models and designs for profiles: info@digahousing.com.

ALUMINIUM ROLLER SHUTTER DOORS&WINDOWS SERIES

Ten reasons for choosing Digah Roller Shutter Doors&Windows:

1. Creating a warm and private space for you

By closing the shutter windows, you can keep the curious eyes out of the window,enjoying your free and private life.

2. Protecting you from the bad weather

The roller shutters provide a powerful protection to your doors and windows, whether it's windy, rainy, hail, or the scorching sun of summer,it always provides a comfortable living room. It also effectively protects your furniture, floors and wooden doors and windows from being exposed to intense sunlight.

3. Providing a barrier for you to sound insulation

The roller shutters filled with fluorine-free polyurethane will effectively reduce the noise for you, and you will get into the sweet dream more quickly in such a quiet and sweet night.

4.Saving more energy for you

Due to the use of the cover,the roller shutters has eliminated the thermal bridge between the rolling shutters and the indoor to save energy.Meantime, a strong air insulating layer would be formed between the glass doors&windows and the shutter doors&windows. If a window of insulating double glasses is installed with a shutter window, its thermal insulation performance will be increased by more than 20%.

5.Providing a burglar barrier for you

Roller shutter doors or windows provide a protective screen to your living room. If you choose the professional anti-theft series of rolling shutter products,for example,reinforced panel, reinforced bar, reinforced slider and anti-push device, then your property will be more powerfully protected. Relevant information could be consulted with the professional customer service.

6.Shutter window with concealed screens

Digah skillfully integrates the mosquito nets in the cover device of the roller shutters. It expands the practicability of the shutter window:in the summer,you can open the shutter window for ventilation while pulling down the screen to prevent the mosquito from entering. This also saves screen installation space and related investment.

7.Simulating the owner's living life by timer switch

The rolling shutters driven by motor can control its opening and closing through programmable timing switch, so that even if you often do not stay home,like going out for travel, the roller shutters can open and close at the set time, creating a kind of effect that the owner at home to effectively prevent the thief.

8.Getting the most comfortable manipulations by wireless remote control

Motor driven roller shutters can facilitate wireless remote control. At the same time, you do not need to dig the wall to put wires and not damage your interior decoration. If the sun sensor is connected, your shutter window will automatically turn on or off according to the intensity of the set light.

9.Realizing group control of multiple shutter windows

A plurality of rolling shutters driven by motors can realize simultaneous opening or closing of multiple doors and windows by means of a group controller. And at any time you can change the group at will. Even the shutter windows of the entire building can be controlled by a small palm controller.

10.Roller shutter is the beautiful coat of your building

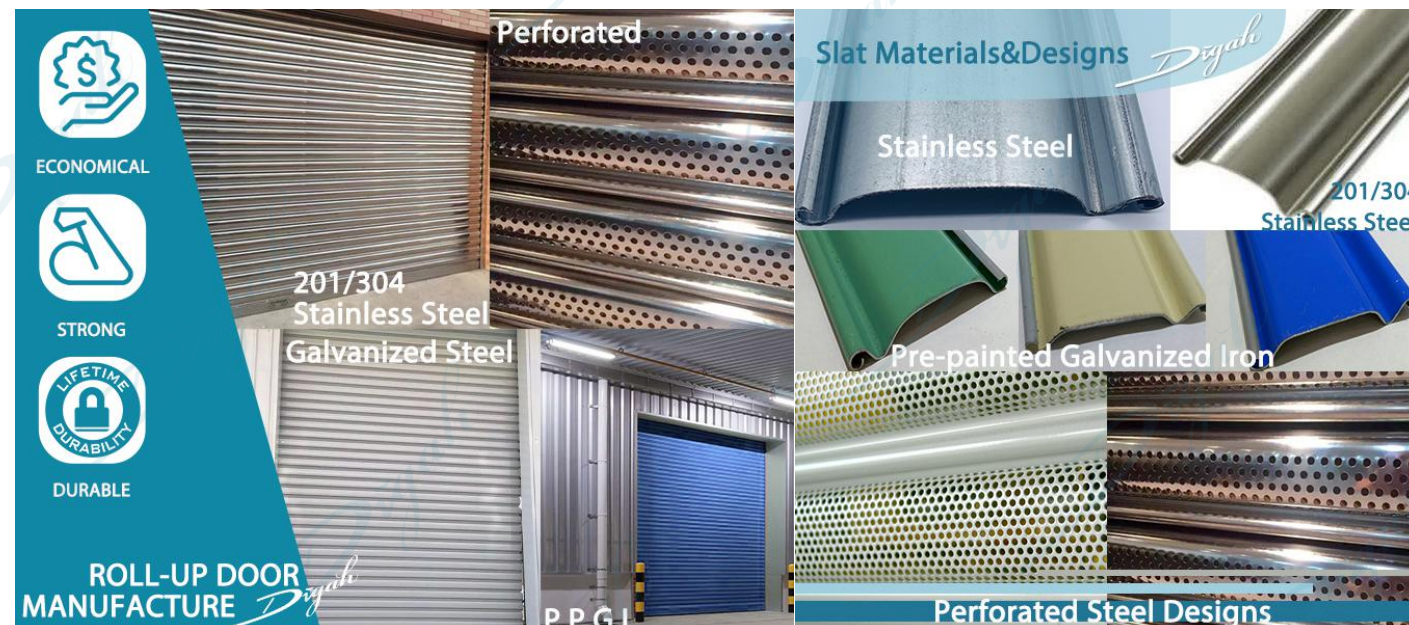

Rolling shutter doors and windows create a new tomorrow for your room! By choosing different designs of the cover and colors of the shutter, Digah provides you with hundreds of combinations and possibilities to create a unique building facade for you.

STEEL METAL ROLLER SHUTTER DOORS&WINDOWS SERIES

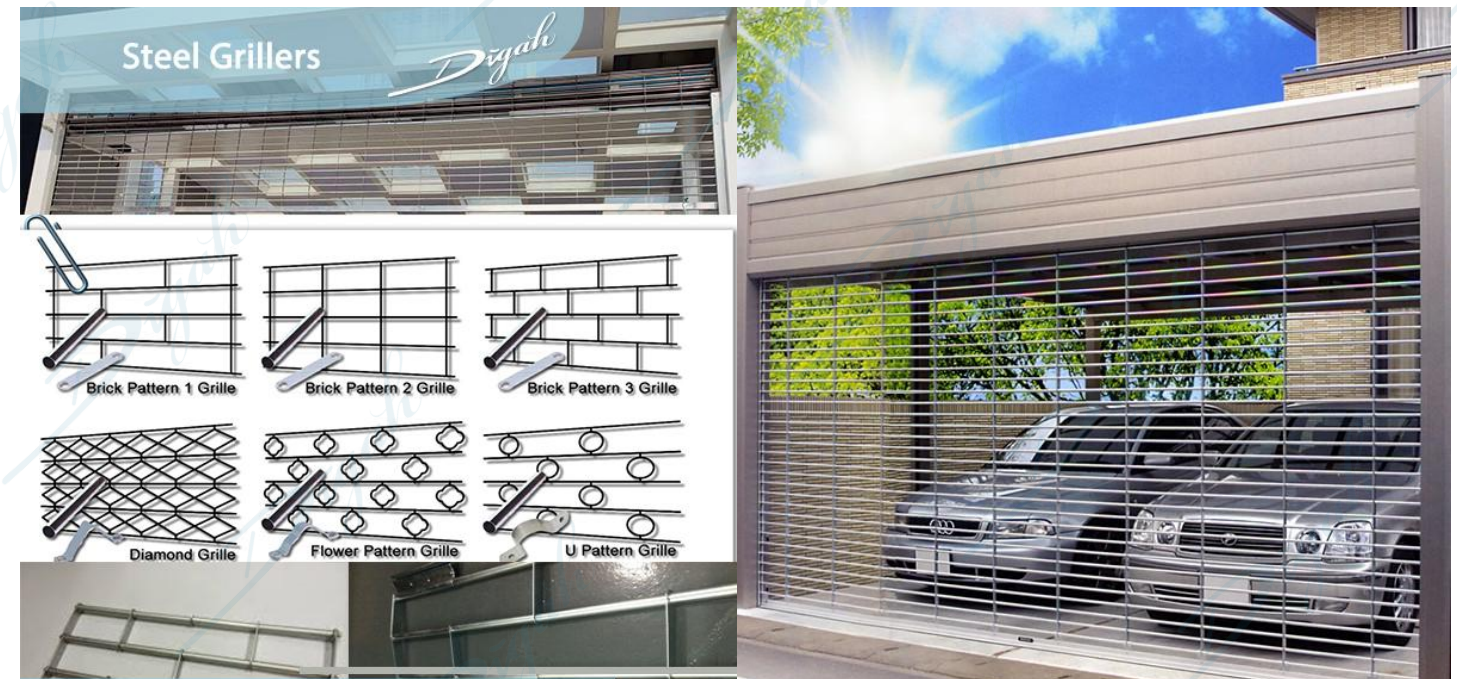

Sheet doors(or corrugated steel doors) are among the most common roll up doors in use today.Known for the durability, steel roll-up doors require little-to-no maintenance and are easily replaceable —making them one of the most reliable and cost-effective roll up doors.

STEEL METAL ROLLER SHUTTER DOORS&WINDOWS SERIES

Materials of metal roller shutters can be galvanized steel,pre-painted galvanized iron,201 stainless steel and 304 stainless steel.Designs can be single layer with various choices of thickness,with or without perforated holes.Metal roller shutter is humanized and its appearance is fashion, beautiful and high-grade. The surface adopts advanced pretreatment technology, it is with strong durability, antioxidation, rain and corrosion prevention, and a variety of colors and styles are available according to customers' demands. It is applicable for villas, commercial streets, residential buildings, banks, industrial plants and so on.

Top 5 advantages of these versatile safely grilles:

1. ATTRACTIVE YET EFFECTIVE BARRIERS

Roller grilles are often considered to be a much more visually appealing option than standard roller shutters as they come in various designs and patterns. Just because they are attractive doesn't mean they are any less effective, however. The gaps between the bars are still small enough to stop thieves getting past and the metal they are made from is incredibly strong.

2. A PHYSICAL AND VISUAL DETERRENT

A building with security roller shutters is a much less appealing target for potential thieves than one that is unprotected. That's because a thief knows that a roller grille is an incredibly strong, physical barrier that would take a lot of time and effort to get past. So, an opportunistic intruder is likely to pass by your premises just from seeing a roller grille in place.

3. PROTECT YOUR STOCK WITHOUT LOSING PASSING TRADE

Roller grilles are ideal for shop fronts and shopping complexes because they provide much needed security for when you're not there but don't block the inside of the store. This means that any customers that happen to be passing by when your shop is shut are still able to look into the store and view your goods.

4. SECURITY GRILLES DON'T BLOCK THE LIGHT

Unlike roller shutters which are totally opaque, security roller grilles have thin bars that are often arranged in an attractive manner. These intricate designs will often leave space in between the metal work which allows lots of light to flow into your property, ideal for when you need both daylight and added security.

5. THEY CAN HELP LOWER YOUR INSURANCE

One of the best things about security roller grilles, other than the added peace of mind about your increased security, is that they can help lower your insurance premium. Insurance companies see roller shutters as an additional layer of protection against thieves and vandals, which means you are less likely to be a target of crime and therefore less likely to claim on your insurance.

AUTO LATERAL SLIDING ROLLING DOOR SERIES

Aluminium/SUS Grill

Automatic Lateral Sliding Rolling Shutters can be made of aluminium profiles, 201 or 304 stainless steel grilles and polycarbonate links.

Sliding rolling shutters have numerous benefits over traditional roller shutters. They can secure very wide openings and openings with limited headroom. They can be used for straight runs or follow a curve, and can be hidden completely from view when they are not in use.

It works without the need for a bottom track. So there is nothing on the floor for people to trip over.

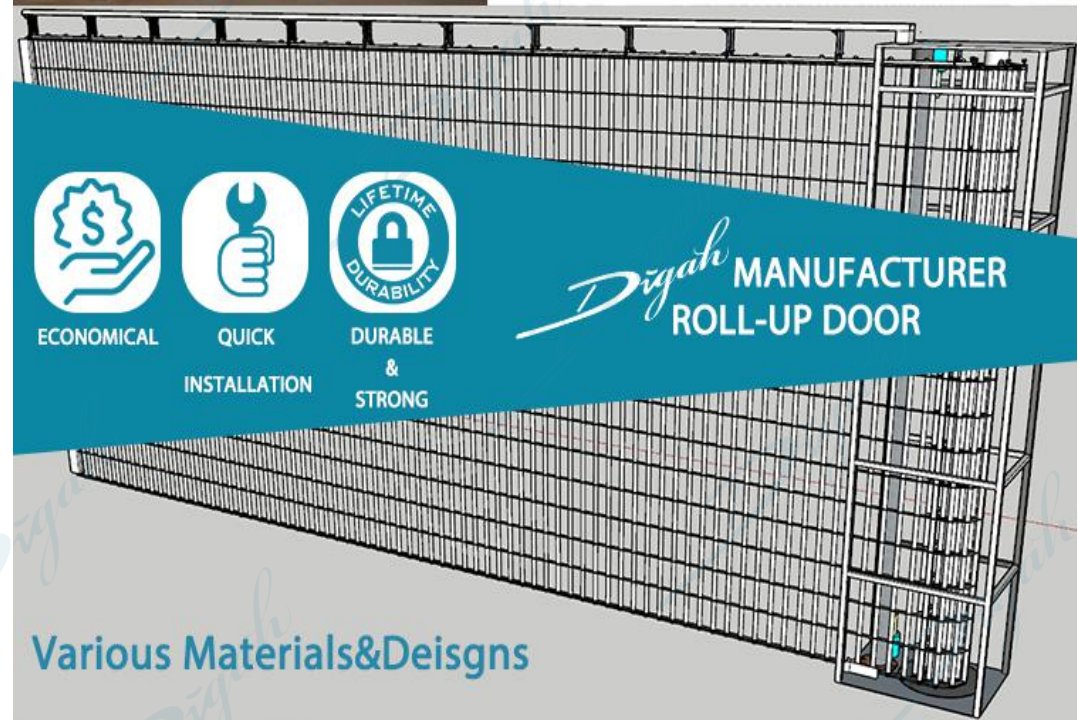

The shutters are concealed when not in use. They're stored to the side where they can be rolled into a custom-built partition wall. So during trading hours you wouldn't even notice a shutter was there. No more big canopy boxes, just a clear opening!

Lateral sliding rolling shutters slide horizontally: an elegant alternative in a world dominated by vertical rolling shutters. You'll have a fresh, modern-looking security shutter built to your design with it.

Sliding shutters can be automated very simply and elegantly. With various materials and designs for selections, automatic lateral sliding rolling shutters can meet various demands for commercial, residential and industrial use such as shopping mall, villas, warehouse, garages and so on.

VARIOUS COLORS

POLYCARBONATE SHUTTER DOOR SERIES

High Reliability

- * The polycarbonate has been experimented and tested that its ability of anti-collision is very strong.it uses special-purpose aluminum link for connection. Its unique design can greatly improve its anti-collision performance.
- * Shutter slat is tight in structure and excellent in sealing performance.

Clear Perspective

- * Excellent perspective effect.
- * Perspective degree is more than 80%, crystal-clear and transparent.
- * The perspective is clear enough to be used for 24 hours display window.

Fashion and beautiful

- * Elegant style, can be combined with commercial door decoration to create a high grade business atmosphere.

Flexible and convenient

- * Easy installation and convenient,providing electric and manual selection.

- * For Brick types,there are a variety of polycarbonate slat types for choices with different sizes of stainless steel tube diameters which make the shutter different in strength and look.
- * The polycarbonate slat can be clear for 24 hours display or frosted to keep privacy.

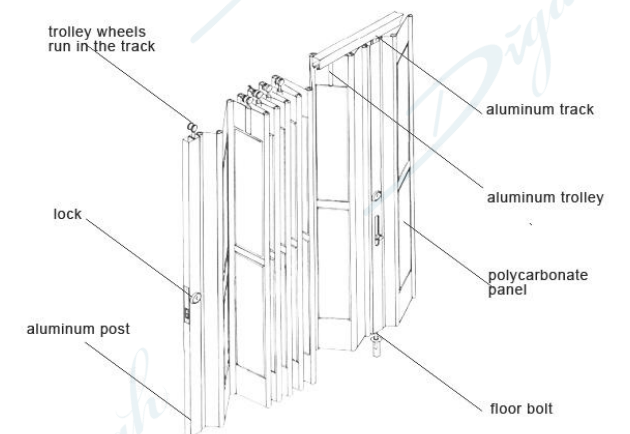

- * For Straight types,different widths of the polycarbonate make the shutter with different great looks.The color of aluminium links can be white,black and silver or customized.
- * In general,its PC slat is clear for 24 hours display but also can be smoked for privacy.

POLYCARBONATE SHUTTER DOOR SERIES

The polycarbonate folding door is highly welcomed for its characteristics of beautiful appearance: novel style, diverse colors, easy to use, push and pull freely, and effectively save the occupancy space of doors, etc. The folding door has the features of light weight, heat insulation, moisture proof, flame retardant, noise reduction, sound insulation, acid and alkali resistance, corrosion resistance and so on. It is easy to clean and also suitable for kitchen, bathroom, toilet and so on. Its installation is easy and fast, lifespan is long and it is easy to maintain. With various choices of different sizes and designs, it has been widely used in office, shop, workshop, large area of heat preservation, insect protection, dust proof, shelter and isolation applications.

FIREPROOF ROLLING SHUTTER DOOR SERIES

The composite steel fireproof shutter is made of special processing, combining with the intelligent characteristic of modern industrial and civil architecture. Its quality reaches the international standard, fire rated time can be over 3 hours. It is applicable the separation of corridor, open staircase, escalator, fire prevention and anti-theft in all kinds of industrial and civil buildings.

Automatic smoke / fire curtains are an essential safety component, designed to protect life and help save lives, by containing and stopping the spread of superheated fire and noxious gases.

FIREPROOF ROLLING SHUTTER DOOR SERIES

- Inorganic Fabric Super Fireproof Shutter:
1. Soft texture, good curling performance, high tensile strength, corrosion resistance and moisture resistance.
 2. The rolling shutter has the advantages of small volume, small space occupation and light weight which can reduce the load bearing capacity of the building, especially for the manufacture and installation of large-span shutter doors.
 3. No need for water spray protection, reducing the investment and occupying space of the water spray system.
 4. Flexible start, low noise and reasonable structure. The appearance of shutter surface can be decorated.
 5. The opening and closing of rolling door can be linked with fire control center, and it can also be self-contained, and it can be opened and closed by functions.

Super Grade Inorganic Stacking Fireproof Shutter:

The special grade inorganic foldable fireproofing shutter refers to the use of inorganic fireproof and heat insulation cloth as door surface, rolling shutter with steel rope and pulley as transmission, and the folding way to lift the door surface, and the span can be extended infinitely in the middle without a column, and it is good to keep the interior full space of the building in the irregular interval of fire prevention.

GARAGE DOOR SERIES

Fireproof Door

The fire door has the characteristics of smooth surface, beautiful appearance, flexible opening, strong and durable, convenient to use, safe and reliable. There are many types for fire doors, which can be customized according to customers demands.

Fireproof Window

Fire windows can isolate and prevent fire spread, there are two types of fire windows:one is fixed fire windows which can not be opened. That is, its surrounding is sealed and fixed. The other is movable fire window which can be opened and closed under the action of the fire window opening and closing device.

Aluminum Glass Garage Door:

- 1.The decorative windows of door panels can be installed with transparent or colorful polycarbonate materials which is easy to remove .It makes your door more stereo with the design of concave and convex groove,more beautiful and stronger sealing performance.
- 2.Characteristics are high durability, heat preservation, thermal insulation,sound insulation and so on.
- 3.High quality torsion spring balances the weight of door panel and reduce the load of motor.
- 4.Omni-directional remote control, remote effective distance, password can be set randomly of which repetition rate is 10 billion points.
- 5.The power off device is made up of a torsion spring manual system, and a power failure emergency lock is provided during power failure.
- 6.The safety protection system automatically stops when the door goes up and automatically rebounds when it falls if meets any obstacle.

GARAGE DOOR SERIES

A wide selection of sectional overhead doors and insulated steel doors is available to satisfy applications where durability, reliability and economy are top priorities. An array of door panel profiles, track and hardware, and specialized options allows you to further customize these doors to your specific project requirement.

Alucobond garage doors (or aluminium composite garage doors specifically) are durable due to its thickness and density. The material creates a form of vibration absorption, is smooth in its finish, and can be molded based on the combination of materials that ultimately make up the product. The doors have a large variety of colors, and finishes ranging from metallic, glow in the dark (after additional processes are undertaken), flat/ matte, satin and gloss finishes. The big advantage of this type of door is the contemporary finish the material provides to the facade of the home.

INDUSTRIAL DOOR SERIES

Industrial Lifting Door
The industrial rolling door is composed of a series of door panels, rising along the track. Industrial rolling door as a upgrade and replacement product of steel rolling door, it has good effects of thermal insulation, wind resistance, good sealing, sound insulation.etc. With characteristics of solid structure, beautiful appearance, saving space and simple operation. Industrial rolling door is widely used in workshop, warehouse, factory gate, logistics center, automobile shop and so on.

High Speed Rolling Door
High speed shutter door is a barrier door with rapid rise and fall. And its main function is quickly isolation, thus to ensure the air quality of the workshop without dust. It has the functions of heat preservation, cold preservation, insect-proof, windproof, dust proof, sound insulation, fire proof, anti odour, day lighting and so on. It is widely used in food, chemistry, textile, electronics, supermarket, freezing, logistics, storage and other places.

INDUSTRIAL DOOR SERIES

Industrial Sliding Door

Features

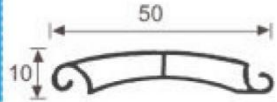

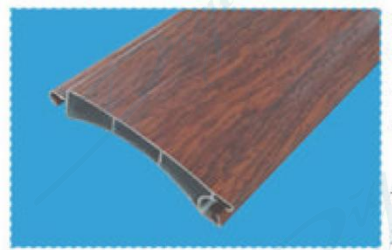

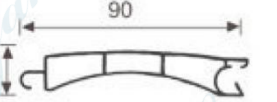

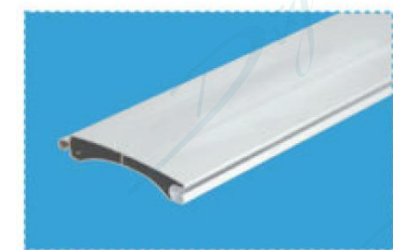

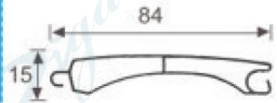

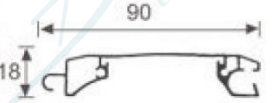

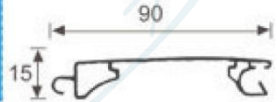

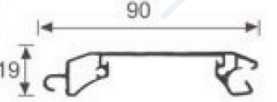

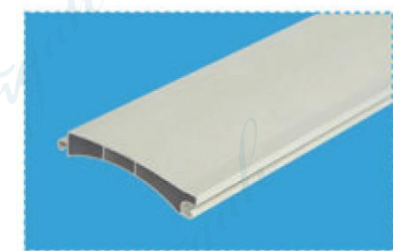

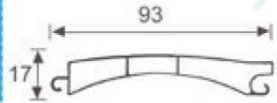

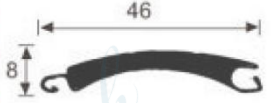

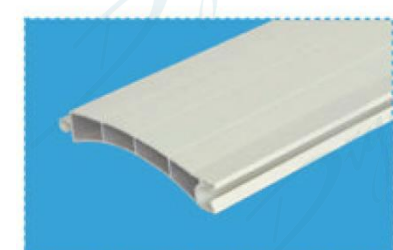

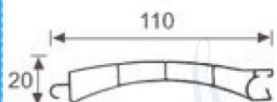

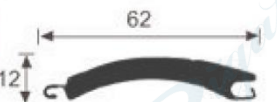

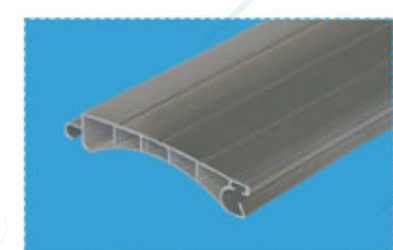

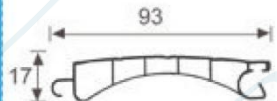

- 1.Safe and reliable, smooth operation:adopting the integral door frame structure ensures the safety of the door load-bearing structure and the smooth operation of the whole structure.
 - 2.Less space occupied and easy to arrange.
 - 3.Its noise is small and sealing performance is high, its appearance is light and door body is light.
- The operating system can be equipped with button control, remote control, automatic operation and infrared safety protection system.
Infrared ray induction device installed on both sides of the door body, even if the door body is forced to open,the infrared induction device starts immediately and keeps the alarm when the person or object enters the door.The sensitive automatic alarm device will start the alarm immediately, no matter what tool is used to illegally push or pry the door body.

Hard Metal High Speed Shutter Door

Hard metal high speed rolling door is a kind of fast rolling door with hollow aluminium door slat. Its structure and performance are similar to fast soft rolling door,but it has the function of anti-theft. And it adopts the tension spring balance system to balance the weight of the door panel, which has better ability and efficiency than the fast soft shutter door.
