

产品外形Product appearance

产品特性 Product features

- ◆ BKQFA-D比例控制气阀该阀具有举升、中停、比例下降控制手柄和中停位置自锁功能。The valve has the functions of lifting, intermediate stop, proportional descending control handle and self-locking at intermediate stop position.
- ◆ 下降过程中气压任意调节，可以控制比例气控换向阀的回油量，实现比例下降功能。The air pressure can be adjusted arbitrarily during the descending process, which can control the oil return amount of the proportional air-controlled reversing valve to realize the proportional descending function.

液压符号Hydraulic symbol

该阀具有单独的取力器开关，可控制自卸车取力器开启、关闭。控制手柄推到下降位置取力器开关自动关闭。

The valve has a separate power take-off switch, which can control the dump truck power take-off to open and close. When the control handle is pushed to the down position, the power take-off switch is automatically turned off.

技术参数 Technical parameter

- 1.公称压力(Nominal pressure): 1Mpa.
- 2.通径 (Air channel diameter) : $\phi 4$ mm.
- 3.控制气压(Control air pressure): 0.6-1MPa.
- 4.工作温度(Operating temperature): -20 to +80°C.
