

Electric Hospital Bed Introduction

Seven functions & Efficient switch on demand

This is an electric bed that integrates multiple functions such as back lifting, leg lifting, assisted side turning, integrated lifting, trendelenburg and reverse trendelenburg, one-button formation and one-button lying down, and is equipped with a doctor-patient interaction system, so that patients can receive safer, more timely and effective treatment.

CM-EHB-7NG

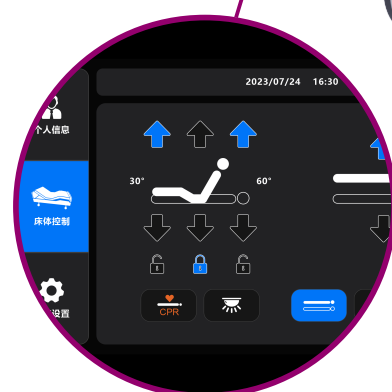

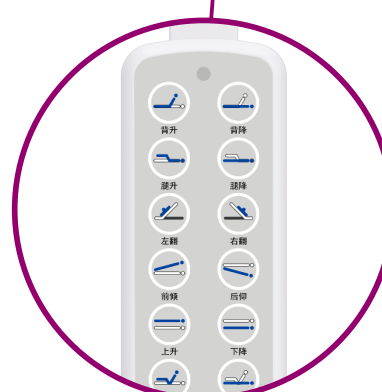

- Advanced technology**
Adopts HDPE material for one-step blow molding, the surface is easy to clean, seamless, does not hide dirt, is impact-resistant, heat-resistant, low-temperature-resistant, and chemical-resistant.
- Angle indicator**
Precise and intuitive display current angle information.
- Film control buttons**
There are bed control buttons in the inner and outer side of cold side, portable operation.
- CPR function**
The emergency situation is quickly returned to the flat lying state, one-click operation, safe and comfortable.
- Double -sided Casters**
The double -sided mute foot wheel can set the lock and free state, tolerate acid and alkali, resist corrosion.
- Night lamp**
Durable LED lights can illuminate the areas where patients enter and exit safely.
- Battery**
In case of emergency power failure, the bed can be reset, and the battery power can be displayed in real time on the display operation panel.

Bed control function

The hand controller on the side of the bed and the control panels on the inside and outside of the bedside guardrail, bringing a safer and more comfortable use experience to medical care staff and patients.

Display operating panel

Visualized 7-inch display operation panel further enriches the user's operating experience. Personal information module registration patient information, bed control module posture data, clearly displays and sets the bed status and angle parameters.

Product Features

- Leg lifting
- Back lifting
- One-button formation
- Integrated lift
- Trendelenburg and reverse Trendelenburg
- Turning Left and Right
- Manual/Electric CPR
- Back lifting angle indicator
- Trendelenburg and reverse Trendelenburg angle indicator
- Night lamp
- Central brakes
- Infusion stand socket
- Four corners anti-collision
- HDPE Blow molded guardrail
- Hand control
- Display control panel
- High quality motor

Electric hospital bed full series of specifications

Model	CM-EHB-5ND	CM-EHB-5NE	CM-EHB-7NG	CM-EHB-7NH
Bed body size mm (long x width, tolerance ± 30 mm)	2270 $\times$ 1080		2295 $\times$ 1180	
Bed surface size mm (long x width, tolerance ± 30 mm)	1995 $\times$ 920		1995 $\times$ 980	
Minimum height of bed surface mm (not including mattress, tolerance ± 30 mm)			480	
Bed surface lifting stroke range mm (tolerance ± 30 mm)			230	
Backboard folding angle range (tolerance $\pm 3^\circ$)			0~70	
Folding angle range of thigh plate (tolerance $\pm 3^\circ$)			0~30	
Folding angle range of calf plate (tolerance $\pm 3^\circ$)			0~12	
Turn over folding angle range (tolerance $\pm 3^\circ$)	No		0~20	
Reverse Trendelenburg angle range (tolerance $\pm 3^\circ$)			0~12	
The maximum angle of Trendelenburg			≥ 12	
Braking method			Central brake	
Measured noise of bed dB			≤ 65	
Weight measurement digital display	No	Yes	No	Yes
UI display	No	Yes	Yes	Yes
