

Aqua LA701

58 x 30 mm M730

The RFID Laundry Tags in Roll are high-performance, industrial-grade RFID tags designed for efficient textile tracking and management in commercial laundries, hospitality, healthcare, and uniform services. Supplied in a continuous roll format, they combine RFID functionality with visual identification (text, barcodes, QR codes) in a format optimized for high-volume, automated labeling workflows.

Containing a firm antenna and rugged packaged microchip that stores a unique and unalterable TID and programmable EPC, they enable flexible, automated, contactless, high-efficiency scanning via RFID readers for fast inventory, sorting, loss prevention, and lifespan tracking — without needing line-of-sight like barcodes.

Designed to withstand repeated washing, drying, ironing, and chemical exposure, ensuring reliable identification throughout the garment's lifecycle, they empower textile providers and user with greater flexibility, faster deployment, and lower total cost of ownership, while maintaining full traceability and operational efficiency. The roll format ensures that laundries can achieve high-volume labeling with minimal waste and maximum convenience.

Applications

- ✓ Hospitality: Hotel linens, towels, robes, uniforms. Prevents loss, optimizes inventory, automates sorting.
- ✓ Healthcare: Hospital linen, patient gowns, surgical textiles. Tracks sterilization cycles, ensures compliance.
- ✓ Industrial / Corporate: Workwear, rental uniforms, cleanroom garments. Manages stock, usage cycles, and maintenance.
- ✓ Sports / Leisure Clubs: Towel rental, locker management.
- ✓ Laundry Service Providers: Automated sorting, billing, loss prevention.

Highlight & Benefits

- Long, efficient and reliable bulk reading for fast inventory and sorting.
- Withstands industrial washing, drying, and ironing processes.
- Flexible attachment options. High resistance to water, detergents, chemicals, pressure, etc.
- Customization-design, printing, encoding available.
- Compatibility with MRI & needle detector.
- Hybrid band: UHF for efficient inventory count and HF/NFC for smart phone identification, traceability, social networking, etc.

Installation

Technical Features

Model	Aqua LA701
RFID Features	
Air Interface Protocol	EPC Class 1 Gen 2, ISO / IEC 18000-63 Type C HF: ISO/IEC 15693 TYPE A NFC: FORUM TYPE 5
Frequency	860-960 MHz & 13.56MHz
Chip Type	Impinj Monza 730
Memory	User - N/A; EPC - 128 bits; TID - 96 bits
Data Storage	> 20 years
Re-write	100,000 times
Read Range (2W ERP)	FCC: > 8.5 m (27.9 ft) ETSI: > 8.5 m (27.9 ft)
Read Range (13.56MHz)	HF: > 3.0 cm(0.98 ft)
Physical Features	
Dimension	58 x 30 mm (2.28 x 1.18 in)
Thickness	1.50 mm (0.04 in) on chip location only, Rest of tag is 0.55 mm (0.02 in)
Weight	0.50 g
Material	Polyester
Installation	Three-side stitching or pouch
Durability Features	
Lifespan	200 washing cycles or 3 years, whichever comes first
Washing Method	Laundry, Dry cleaning
Water Extraction Pressure	60 bars
Chemical Resistance	Detergent, Softener, Bleach (Oxygen / Chlorine), Alkali
Washing Temperature	90°C (194°F) / 15 minutes
Pre-drying in Tumble	180°C (356°F) / 30 minutes
Ironing Tempereature	185°C (365°F) / 10 seconds
Sterilization Tempereature	135°C (275°F) / 20 minutes
Other Features	
Humidity / Temperature-Operating	-20~+85°C (-4~+185°F) / 8~95%RH
Customization	Printing, Encoding, Design, etc.
Package	500 pcs / roll, 8 roll / box
